

Eryclone[®] Anti C+D+E Monoclonal Rh genotyping antibodies for slide and tube tests

Intended Use: _____

Eryclone[®] Anti C+D+E reagent is useful for determination of probable Rh genotype of an individual, for selection of donors who become immunized with Rh antigens during pregnancy or transfusion, in pre-transfusion testing and prediction of hemolytic disease of the newborn.

Eryclone[®] Anti C+D+E Kit components:

Eryclone [®] Anti C+D+E	Ready to use reagent prepared from monoclonal cell culture supernatant of respective human cell lines
Other Accessories	Package Insert

Performance Characteristics:

Titre:	~ 1:32 with r'r (dCe/dce) phenotype	Specificity: 100% to C, D, E antigen
	~ 1:32 with R,r (Dce/dce) phenotype	Standardization: Follows AABB and FDA guidelines
	~ 1:32 with r''r (dcE/dce) phenotype	

BENCHMARKS	TULIP SOLUTION
Maintenance of optimum pH and ionic strength	Buffer with broad buffer capacity Ensures right conformational fit between antigen and antibody
Protect and preserve antibody activity	Optimum concentration of stabilizers Preserves antibody activity for long term use and storage
Optimum protein concentration	Well balanced to maintain optimal reactive conditions

Storage / Stability	Temperature	Duration
Unopened kit	2-8°C	24 Months
Opened kit	2-8°C	24 Months

Available Pack Sizes
5 ml
