

Matrix™ Erygen-A₁ Red Blood Cells for reverse grouping

Intended Use: _____

Matrix™ Erygen-A₁ comprises of a 0.8% reagent red blood cells of A₁ suspended in an isotonic medium containing a preservative which is employed in the confirmation of the results of forward grouping.

Matrix™ Erygen-A₁ Kit components:

Matrix™ Erygen - A₁ cells	0.8% reagent red blood cells of Group A ₁
Other Accessories	Package Insert

Performance Characteristics:

Specificity: ABO isoagglutinins	Standardization: Follows FDA guidelines
--	--

FEATURES	BENEFITS
Ready to use	Solution comprises of RBCs in an appropriate concentration in a preservative solution Components in precise quantities ensure maximum benefits during blood grouping
Four component pack	Separate reagents for different cell types

Storage / Stability	Temperature	Duration
Unopened kit	2-8°C	36 days
Opened kit	2-8°C	36 days

Available Pack Sizes
10 ml
