

Amicheck-Trop I-WB™ Rapid test for Troponin I

Intended Use: _____

Amicheck-Trop I-WB™ is a rapid, two-site sandwich immunoassay for the detection of human cardiac Troponin I (cTnI) levels in human whole blood, serum and plasma.

Amicheck-Trop I-WB™ kit components:

Device	Membrane assembly pre-dispensed with Agglutinating sera for cTnI-colloidal gold conjugate, rabbit globulin- colloidal gold conjugate, Agglutinating sera for cTnI and Agglutinating sera for rabbit globulin coated at the respective regions.
Buffer	Ready to use buffer in a dropper bottle.
Dropper	Disposable plastic sample dropper.
Other Accessories	Desiccant pouch and Package Insert.

Performance Characteristics:

Sensitivity: 100%	Specificity: 100%
--------------------------	--------------------------

FEATURES	BENEFITS
High Sensitivity and Specificity to result	The test incorporates high avidity monoclonal antibodies to cTnI.
Detects even minor Myocardial injury	Detects cardiac Troponin I ≥ 0.3 ng/ml.
Ideal for point of care testing	Whole blood as specimen, Easy to use, Rapid simple test procedure.
Rapid turn around time	20 minutes time required.

Storage / Stability	Temperature	Duration
Unopened kit/pouch	4-30°C	24 Months
Opened pouch	Room Temperature	Use immediately

Available Pack Sizes
10 Tests
