Quick Reference Guide

Insight AMP Rapid competitive immunochromatographic assay for the detection of Amphetamine in human urine

Insight AMP, a rapid, self performing, qualitative, immunochromatographic assay which detects the presence of amphetamine in human urine specimen.

Insight AMP kit components:

Device	Membrane test assembly impregnated with colloidal gold conjugated to anti amphetamine antibody monoclonal and mouse IgG, amphetamine conjugated to BSA and goat anti mouse IgG at the respective regions	
Dropper	Disposable plastic sample dropper	
Other Accessories	Desiccant pouch and Package Insert	

Performance Characteristics:

Sensitivity: Detects AMP levels in human urine above or equal to 1000 ng/ml

FEATURES	BENEFITS	
High Efficiency	Directly detects the presence of the drug molecule in concentrations as low as 1000 ng/ml	
Simple and Convenient	Ideal for Point of care testing	
Urine used as a sample	Ensures that the sample can be collected easily without the need for a professional	
Five minutes running time	Rapid turn around time, quick diagnosis	
Storage at 4 – 30°C	Flexibility of remote distribution, storage and on the spot testing even in physician's office and field settings	

Storage / Stability	Temperature	Duration
Unopened kit	4-30°C	18 Months
Opened pouch	4-30°C	Use immediately

Available Pack Sizes
10 Tests
