

Insight HBsAb

Rapid immunochromatographic assay for detection of HBsAb in human serum

Intended Use: _____

Insight HBsAb, a rapid, self performing, two site sandwich immunoassay that is used to detect the presence of HBsAb in human serum and is useful to (a) monitor success of therapy from an acute HBV infection (b) determine past exposure to Hepatitis B surface antigen and (c) testing for immunity to Hepatitis B.

Insight HBsAb kit components:

Device	Membrane test assembly impregnated with colloidal gold conjugate to HBsAg and mouse IgG antibodies, HBsAg antigen and goat anti mouse IgG at the respective regions
Dropper	Disposable plastic sample dropper
Other Accessories	Desiccant pouch and Package Insert

Performance Characteristics:

Sensitivity: ~30mIU

FEATURES	BENEFITS
Reliable Performance	Good correlation with commercial ELISA
Simple and Convenient	Rapid one step assay No need of expertise and automation
Fifteen minutes running time	Rapid turn around time, quick diagnosis
Storage at 4 – 30°C	Flexibility of remote distribution, storage and on the spot testing even in physician's office and field settings

Storage / Stability	Temperature	Duration
Unopened kit	4 – 30°C	18 Months
Opened pouch	4 – 30°C	Use immediately

Available Pack Sizes
10 Tests
