

**Insight OPI****Rapid competitive immunochromatographic assay for the detection of Opiates in human urine****Intended Use:** _____

Insight OPI, a rapid, self performing, qualitative, immunochromatographic assay which detects the presence of opiates in human urine specimen.

Insight OPI kit components:

Device	Membrane test assembly impregnated with colloidal gold conjugated to anti opiates antibody monoclonal and mouse IgG, opiates conjugated to BSA and goat anti mouse IgG at the respective regions
Dropper	Disposable plastic sample dropper
Other Accessories	Desiccant pouch and Package Insert

Performance Characteristics:**Sensitivity:** Detects OPI levels in human urine above or equal to 300 ng/ml

FEATURES	BENEFITS
High Efficiency	Directly detects the presence of the drug molecule in concentrations as low as 300 ng/ml
Simple and Convenient	Ideal for Point of care testing
Urine used as a sample	Ensures that the sample can be collected easily without the need for a professional
Five minutes running time	Rapid turn around time, quick diagnosis
Storage at 4 – 30°C	Flexibility of remote distribution, storage and on the spot testing even in physician's office and field settings

Storage / Stability	Temperature	Duration
Unopened kit	4 – 30°C	18 Months
Opened kit	4 – 30°C	Use immediately

Available Pack Sizes
10 Tests
